### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 25 July 2006.
- 2a) ☐ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Election/Restrictions***

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

A: Embodiment of Figure 2

B: Embodiment of Figure 3

C: Embodiment of Figure 4

D: Embodiment of Figure 5

E: Embodiment of Figure 6

F: Embodiment of Figure 7

G: Embodiment of Figure 8

H: Embodiment of Figure 9

I: Embodiment of Figure 10

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

Art Unit: 1791

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Claim 2, corresponds to Species: A, B, C, E, F, G,  
Claim 3, corresponds to Species: F, G, H, I  
Claim 4, corresponds to Species: A, B, C, D, F  
Claim 5, corresponds to Species: H  
Claim 6, corresponds to Species: G, I  
Claim 7, corresponds to Species: G  
Claim 8, corresponds to Species: A, B, C, D, F, H  
Claim 9, corresponds to Species: B  
Claim 10, corresponds to Species: C  
Claim 12, corresponds to Species: A, B, C, E, F, G,  
Claim 13, corresponds to Species: A, B, C, E  
Claim 14, corresponds to Species: A, B, C, E,

The following claim(s) are generic: 1, 11, 15.v

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

The common technical feature between the species is sealing a fiber-based material to a counter surface by directing a laser beam through a fiber layer and melting polymer at a sealing area with a pigment at the sealing area to absorb a laser beam. Kammler et al. [DE19516726A1, Machine Translation provided, herein "Kammler"]. Kammler discloses a method of welding paperboard sheets together. The method comprises providing paperboard base materials, a fiber-based material, that is coated with a polymeric material, abutting the polymeric coatings, sealing the base materials together by directing a laser beam through the base material to the polymeric coating to melt and weld the polymeric coatings together (pages 1 and 3). Kammler also discloses the radiation absorption is improved by including an absorption substance "pigment" in the weld areas (page 2). Because all of the common technical features are taught by Kammler, there is no common special technical feature.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 1791

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DANIEL MCNALLY whose telephone number is (571)272-2685. The examiner can normally be reached on Monday - Friday 8:00AM-4:30PM.
